WILSONART COMPLETE ADHESIVE & SEALANT

Most popular FAQ's...

How much adhesive do you need to use on a wilsonart shower panel?

A 290ml bottle will approximately cover 20 linear metres at a 5mm bead or 9 joints.

How long does the sealant and adhesive last once open?

Once open, Wilsonart Complete Adhesive and Sealant will last up to 12 months, ensuring the nozzle cap is left on and fixed securely

How long does it take to cure?

4 hours handling strength for bonding, 30 minutes skin over time.

What's the texture of the adhesive?

The Wilsonart Complete Adhesive is available in a homogenised paste.

How do you remove the sealant?

Any excess Wilsonart Complete Sealant can be removed with a knife or specialist sealant removal tool.

How long is it recommended to replace the sealant?

You should not need to replace the sealant.

What is the fire safety around each product?

Each Wilsonart product has been carefully tested, successfully passing a 60 second vertical burn test.
